Subject Index

A
Acid precipitation 15
Age-dependence, plant reproduction 72
Algae, chloroplast evolution 64
Allomaternal behaviour, dolphins 147
Altruism, reciprocal 142, 147
Amazonia, conservation 48
Ants, social parasitism 155
Argentina, desertification 78
Arms races, coevolution 105, 108
Assimilate movement, plants 120

B
Bangladesh, conservation 34
Barracuda, protein adaptation 125
Biogeography, molecular evolution 124
tropical forest organisms 165
Biomechanics, plants 67, 68
Blackbird, red-winged 141
Body size, marine organisms 55
Branching patterns, fossil plants 70
Brazil, conservation 48
Brood reduction, nestling birds 33, 56

C
C3 pathway 43
C4 pathway 43
Caatinga, Brazil 78
Captive breeding programs 19
Catastrophism 128
Cerrado, Brazil 78
Cetaceans 144
Chaco, Argentina and Paraguay 78
Chaffinches, song 95
Chamaelirium luteum 116
Chaos, ecological systems 58
Character displacement 26, 131
Chernobyl, radioactive contamination 23
Chile, desertification 78
Chloroplast evolution 64
Cichlids, Midas 115
Climatic change, tropical forest 165
Coadaptation 108
Coevolution, arms races 105, 108
predators and prey 108
Coexistence 27, 77, 131
plants 162
Communication, whales and dolphins 144
Community ecology, plants 161
Competition, plants 76, 162
Competitive exclusion 25, 131
Computer simulations, branching patterns 70
Conservation, Bangladesh 34
black rhinos 9
Brazil 48
elephants 104
extinction models 46
grizzly bears 47, 88
northern spotted owls 113
population genetics 88
rare species 19
Sri Lanka 104
subspecies 9, 104
Crassulacean acid metabolism 43
Cultural transmission, bird song 94

D
Dehydrogenases 125
Density-dependence 39
detection 90
Density-dependent mortality 71
Density-vagueness 39
Desert plants, root systems 76
Desertification, South America 78
Digestion, vertebrate energetics 102
Disease, community ecology 11
Distemper, canine 14
DNA, chloroplasts 64
Dogs, hunting 13
Dolphins 144
Dormancy, seeds 73
Drosophila, rare male effects 4
speciation 118
Dulosis 115

E
Eagle, bald 56
Economic theory, applications in plant ecology 98
Effective population size 20
Egret, great 33
Elephants, conservation 104
Endosymbiosis 64
Energetics, vertebrate ecology 101
Enzyme activity, biogeography 125
vertebrate energetics 103
Evolutionarily significant units 9
Evolutionarily stable strategies 105
Extinction, mass 127
models 46

F
Female choice, genetics and evolution 1
pied flycatchers 85
Fibonacci series 121
Fig wasps, sex ratio 36
Fighting behaviour, Midas cichlids 115
Finch, double bar 8
zebra 4, 8
Flowering, onset 72
Flycatchers, pied 85
Food webs, stable isotope analysis 45
Foraging, vertebrate energetics 101
Founder populations 19
speciation 118

G
Game theory 115
Gaps, tropical forest 152
Gas exchange, plant geometry 68
Gazelle, Speke's 21
Genetic diversity, conservation 20
Genetic drift 86
Geometry, plants 68
Gestation, whales and dolphins 144
Gradualism 128
Grazing, effects on plants 168
Grizzly bear, conservation 47, 88
Grouse, red 12
Guest ants 155

H
Haemoglobins, evolution 126
Harem formation 141
Haystack model 37
Herbivory, effects on plants 168
Heron, great blue 33
Hydraulics, vascular plants 68

I
Inbreeding, coefficient 20
depression 20
Indigobirds, song 94
Individualistic continuum concept, plants 161
Inquilinism 155
Insect–plant interactions, 9
Integrated physiological units, plants 119
Interference, competitive 133
Intertropical Convergence Zone 166
Introns, chloroplast evolution 66

K
Kin selection, ants 160
K–T event 127
Kyshtym, radioactive contamination 23

L
Lactation, whales and dolphins 144
Ladybird, two spot 5
Leaf longevity 16
Learning, birds 94
Leg bands, sexual selection 8
Lemmings, sex ratio 37
Life table analysis 90
Life–dinner principle 106
Lifespan, plant reproduction 73
Logging, Douglas fir forest 113

M
Macroparasites 11
Malaria, Hawaiian landbirds 12
Mark–recapture studies, sperm whales 147
Mass extinction 127
Maternity, plants 116
Mating success, plants 116
Meristems 119
Metabolism, vertebrate ecology 101
Metamers 119
Metapopulation dynamics 46
Microparasites 11
Migration, between populations 40
Minimum viable population 46, 88
Molecular evolution 124
Monocarps, reproduction 73
Morphology, fossil plants 67
Mortality, tropical forest seedlings 151
Mutualism 106
Myoglobins, evolution 126

N
Neutralism, molecular evolution 125
Niche, differentiation in root systems 77
shift 28
theory 86, 161
Nitrogen fixation 43
Non-linear dynamics 58
Nuclear power stations 23

O
Odontocetes 144
Old-growth forest, conservation 113
Ordination, plant communities 161
Origins of life 134
Overcompensation, plants 168
Owl, northern spotted 113

P
Palaeobotany 67
Palaeoclimates 166
Palynology, tropical forest 165
Parasite–host interactions 91, 105
Parasites, community ecology 11
Parasitism, social 155
Parasitoids 11, 36
Patchiness 40
Paternity, plants 116
Pathogens, community ecology 11
Pelagic ecosystems 55
Permanent parasitism 155
Phenotypic plasticity, plants 71
Photosynthesis, plant geometry 68
tropical forest trees 153
Phyllotaxy 121
Pioneers, tropical forest 152
Plankton, oceanic 55
Plant–herbivore interactions, chaotic models 60
Plastids, evolution 64
Pleistocene, refugia 165
Pollinator–plant interactions 121
Pollution, consequences for plant growth 15
radioactive 23
Polycarps, reproduction 73
Polygamy threshold model 141
Polygyny, ants 159
red-winged blackbirds 141
whales 145
Polymorphism, sexual selection 6
speciation in *Drosophila* 118
Population biology, whales and dolphins 144
Population viscosity 37
Predation 27, 131
seeds in tropical forest 151
Predator–prey interactions 108
Predator–prey models, chaos 59
Pressure, hydrostatic, and enzyme activity in fish 125
Protein evolution 124

R
Radioactive contamination 23
Rare-enemy effects 106
Rare-event selection 130
Rare male effects, *Drosophila* 4
Reaction norms 105
Refugia, conservation 48
Pleistocene 165
Regeneration, tropical forest trees 150
Regeneration niche 162
Reproduction in plants, timing 72
Resource allocation, plants 75, 98
Resource holding potential 115
Rhino, black 9
Rinderpest 13
Roots systems, desert plants 76

S
Secondary contact,
speciation in tropical
forest 167
Secondary sexual
characters 1
Seed predators, tropical
forest 151
Serengeti National Park 13
Sex ratio 35, 56
zebra finches 8
Sexual selection 1, 35
long-tailed widowbirds 3
pied flycatchers 85
plants 116
sticklebacks 3
two-spot ladybirds 5
zebra finches 4, 8
Shade tolerance, tropical
forest trees 153
Sibling aggression, nestling
birds 33
Size-dependence, plant
reproduction 72
Slavery, ants 155
Social behaviour,
ants 156
whales and dolphins 144
Social parasitism, ants 155
Song,
birds 94
humpback whales 146
Spatial distribution, tropical
forest trees 152
Spatial heterogeneity 40
Speciation 117
Drosophila 118
tropical forest 166
Spore-dispersal, fossil
plants 68
Sri Lanka,
conservation 104
Stable isotopes,
physiological ecology 42
Stickleback, three spine 3
Stomatal conductance,
pollutants 16
Studbooks 20
Subspecies,
conservation 9, 104
Superparasitism 36

T
Tamarin, golden lion 21
Temperature
adaptations 125
Temporary parasitism 155
Territory,
fighting behaviour 115
red-winged
blackbirds 141
Throughfall chemistry 15
Ticks, red grouse 12
Trees, tropical 150
Tropical forest 165
regeneration 150
Tungara frog 4

U
Unemployment,
conservation 48

V
Vegetation science 161

W
Whales 144
Widowbird, long-tailed 3

X
Xenobiosis, ants 155

Y
Young's modulus 68

Z
Zoos 9, 19
